# SKIN RESURFACING

Let us smooth your skin and erase imperfections. Our clinically trained estheticians will conduct a skin analysis and provide the treatment of your choice – from chemical peels formulated to repair damage to microdermabrasion that helps stop the clock.

## Pure Diamond Microdermabrasion with LED

This treatment combines two of the most advanced skin repairing methods: diamond microdermabrasion and LED light therapy. The multi-function system removes the outermost layers of dead skin, forcing new skin cells to turn over at an accelerated rate. The capillary walls are strengthened and collagen begins to restructure. A special mask is applied to help calm, hydrate and firm the skin. The session is completed with a cocktail of medical strength products for a healthier, more youthful glow.

50 minutes

### Anti-Aging Glycolic Acid Peel

This universal peel is suited for most skin types. The outer layers of thickened and keratinized skin cells are removed, leaving skin fresh, smooth and healthier.

50 minutes

### Skin Brightening AHA / Lactic Acid Peel

A multitude of lightening agents, including naturally derived botanicals, are used to treat hyper-pigmented skin types, providing a more even, consistent skin tone.

50 minutes

*NOTE: For best results, we recommend a series of treatments over a course of several weeks or months. Please ask to consult with our clinically trained esthetician before scheduling any skin resurfacing treatment.*
